SITRAIN for GBSIoT

How easy are the courses to navigate?

Users can follow our guided course pathways to learn new expertise and all pathways are designed to build in depth and detail from "Entry" level to "Intermediate" to "Advanced", so that users can reach the point of training that best suits their learning requirements and objectives.

Each course consists of a sequence of Siemens' bespoke modules, which train the user in the operation and management of Siemens specialist technologies.

All modules are self-directed – meaning that they can be studied at the users' own preferred pace - and they are delivered online via video and other web-based resources.

How is progress recorded?

Each user's progress is recorded on their personal "SITRAIN for GBSIoT" dashboard and can evidence their achievements at any time. Completion of each course is an excellent primer for Siemens' own formal qualifications, which can be taken separately.

How do I apply for access to "SITRAIN for GBSIoT"?

To find out more, and to sign up for "SITRAIN for GBSIoT", email: enquiries@gbsiot.ac.uk

Access to "SITRAIN for GBSIoT" is free to eligible users as part of the STEM-Up project which is supported by the GBSIoT. The STEM-Up project, part-funded by the European Social Fund, delivers more than 60 free workshops, webinars and courses in STEM, STEAM and Soft skills subjects, run by Birmingham City University, Aston University and Solihull College & University Centre. "SITRAIN for GBSIoT" users can also access STEM-Up's courses in Digital, Creative Media, Manufacturing, Engineering, Construction, Sustainability, STEAM Thinking, Business & Management and Interpersonal Skills subjects.

Eligibility: users must be aged 18 and over, with Right to Work in the UK and resident in Birmingham, Solihull, Bromsgrove, Redditch or Wyre Forest, although enquiries from outside these regions will still be considered.
